REMEDY SIMULATION GROUP

For over a decade, **Remedy Simulation Group** has provided the best simulation solutions for the medical community and beyond. Utilizing cutting edge technology as well as traditional production methods, we are able to craft training products that are unequalled in their realism and functionality. From basic nursing skills task trainers to complicated surgical procedure simulators, we provide an authentic experience for universities, medical students, hospitals, nurses, corporations and all other end users.

Drawing from decades of experience and multiple disciplines, our team of engineers, designers and production specialists approach each project as a collective unit to develop and fabricate the finest products. As we strive to fill the urgent needs of the industry, we collaborate directly with our clients as well as doctors, nurses and industry experts to provide solutions that are both relevant and cost-effective. To ensure effectiveness and durability, all our products are thoroughly tested to the highest standards and made exclusively in the USA at our Perkasio, Pennsylvania manufacturing facility.

Remedy Simulation Group is also an industry leader in custom manufacturing. We offer design, development and manufacturing solutions for major corporations as well as small business start-ups - no job is too big or too small. The **RSG** team approaches these contract manufacturing projects with the same mind-set that we do with our own products. We work in unison with our clients to establish an effective relationship first and foremost. From there, our goal is to achieve a result that is far beyond the expectations of our manufacturing partners.

NURSING 101 TRAINING KIT

This comprehensive training kit is designed to correspond with the current curriculums offered at Nursing Schools, Universities, Vocational and Technical Institutions throughout the world. We've included each of our highly successful task training models in one complete package for your convenience. Stock your Simulation Lab now with the very best nursing skills trainers in the industry
- The Remedy Simulation Group "Nursing 101 Training Kit".

Each Nursing 101 Kit Contains:

- 1 **Cathi** Female Catheterization Trainer
- 1 **Willi** Male Catheterization Trainer
- 1 Catheterization Trainer Stand
- 1 **Venous Bleu** Venipuncture Trainer
- 1 **Ivy** Intravenous IV Trainer
- 1 **Paddy** Small Injection Pad
- 1 **Patrick** Large Injection Pad
- 1 **Lance** Blood Glucose Test Trainer
- 1 **Pete** Simulation Thigh Injection Pad
- 1 **Patricia** Simulation Belly Injection Pad
- 1 Moulage Wound Care Trainer:
(Moulage Tattoos 5-sheet set & skin pad)
- 1 Removable Epi-Layer Set (9 pack)

Available in light or dark skin tone

CATHI

Female Catheterization Trainer

- Soft & delicate, realistic feeling silicone
- Successful catheterization is confirmed with urine flashback
- Minora realistically closes over vaginal and urethral openings
- Fits most existing Laerdal manikins
- **Available in a Combo Set with Willi**
- Available in light or dark skin tone

WILLI

Male Catheterization Trainer

- Soft & delicate, realistic feeling silicone
- Successful catheterization is confirmed with urine flashback
- Ability to simulate enlarged prostate
- Includes removable foreskin
- Fits most existing Laerdal manikins
- **Available in a Combo Set with Cathi**
- Available in light or dark skin tone

BLADDER & STAND

Catheterization Bladder

- **INDUSTRY EXCLUSIVE:** Our unique bladder design allows the catheter to coil inside providing urine flashback, signifying proper catheterization
- Purposely fabricated only for Remedy Cathi and Willi catheterization trainers
- Included with all Remedy catheterization trainers

Catheterization Stand

- Designed exclusively to fit our Cathi and Willi catheterization trainers
- Durable, rigid urethane construction
- Sturdy base with non-slip pads

VENOUS BLEU

IV & Venipuncture Trainer

- Simulates basic venipuncture and IV administration skills
- Durable and realistic skin as well as authentic blood flashback
- Single vein with new VesSeal™ technology allows for repeated sticks
- Hard backing allows for use on patient simulator or standardized patient
- Lightweight adjustable band for comfortable fit
- Available in light or dark skin tone

VENOUS BLEU REPLACEMENT PAD

Venous Bleu Replacement Skin Pad

- Simple Velcro attachment makes replacement quick and easy
- Attaches to existing Venous Bleu arm band and IV bag assembly
- Available in light or dark skin tone

IVY

IV Administration Trainer

- For intravenous medication and fluid administration/flushing training
- Can be used on standardized patient or patient simulator
- Practice setting IV flow rates
- Realistic drawback
- Can be used with any IV pump
- Not intended for IV insertion
- Lightweight, adjustable band for comfortable fit
- Available in light or dark skin tone

PADDY & PATRICK INJECTION PADS

Both Injection Pads:

- Can simulate “wheal” during intradermal injections, when used with epidermis layer
- Feature realistic puncture resistance
- Have bottom drainage and plastic tray for use with fluid-filled syringes
- Include three removable epidermis layers
- *Are available in light or dark skin tone*

Paddy Small Injection Pad Trainer

- Can simulate four different injections: intramuscular, intradermal, intravenous and subcutaneous
- Size: 2.5" x 2.5" x 1.875"

Patrick Large Injection Pad Trainer

- Skin can be grasped for more realistic scenarios
- For simulating Z-track, intra-muscular and subcutaneous injections
- Size: 6" x 6" x 2"

PATRICIA & PETE / EPI LAYERS

Patricia & Pete

Wearable Injection Pad Trainers

- Wearable pads for intramuscular & intradermal injections with protective plate for safety
- Can be used on standardized patient or simulator
- Bottom drainage for use with fluid filled syringes
- Two formulations: Patricia - Soft (Abdominal) and Pete - Firm (Thigh)
- *Available in light or dark skin tone*

Removable Epidermis Layers

- For use with all Remedy injection trainers
- Simple to use, just peel and place where desired
- Helps simulate “wheal” for intradermal injections
- Each package has nine separate epidermis layers
- *Available only in light skin tone*

LANCE

Blood Glucose Test Trainer

- Simulates the finger stick for blood glucose testing
- Fits on finger of standardized patient or patient simulator
- Protective liner for safety
- Fill with simulated blood for realistic simulation experience
- Available with or without Fill Kit
- Fill Kit includes 8ml simulated blood and 5ml syringe
- Package includes three fingers
- Available in light or dark skin tone

GLUCOMETERS

“Hospital” Glucometer Training Kit and “Pharmacy” Mini Glucometer Training Kit

- The “Hospital” Glucometer Training Kit includes: Remedy Large Glucometer and Lance Kit
- The “Pharmacy” Glucometer Training Kit includes: Remedy Mini Glucometer and Lance Kit
- Both can be controlled via Bluetooth with programmable ranges
- Works with all fluids (real or sim blood) as well as expired glucose strips
- Can be used on standardized patient or patient simulator
- Lithium battery powered
- Runs on Mac, Windows, iPad, Tablets, iPhone and Android
- Available with mmol/L or mg/dL
- *Included Lance Kit comes with three test fingers in your choice of light or dark skin tone*

ADVANCED TISSUE INSERT

For Tissue Closure Training

- Five layers match the feel of epidermis, dermis, fat, muscle, and also includes an enhanced subcuticular layer
- All layers accept adhesive and bandage closure methods
- Will not propagate tears and holds sutures appropriately
- Available in light or dark skin tone

BASIC TISSUE INSERT

For Tissue Closure Training

- Four layers developed to match the distinct feel of the epidermis, dermis, fat and muscle
- All layers accept adhesive and bandage closure methods
- Will not propagate tears and holds sutures appropriately
- Available in light or dark skin tone

ACCESSORIES

Sim Blood

- For use with Lance, IV & Venous Bleu
- For demonstration use only - will not give glucose reading if used with Glucometer
- Only available in USA

Pressure Infuser Bag

- Can be used as an alternative to hanging an IV bag for urine flashback

Demo Bio-Patch

- Package includes 25 Bio-Patch discs for use in simulation

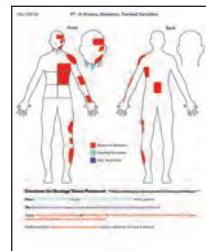

MOULAGE TEMPORARY TATTOOS

Our exclusive moulage temporary tattoos allow users to easily train for a wide range of scenarios without costly and time-consuming makeup or prosthetics. Simply apply these temporary tattoos to a live patient actor or patient simulator and begin your training. Remedy's tattoo sheets cover practically every scenario you can imagine from fractures and burns to gun shot wounds, lacerations and blunt force trauma. They are quick and simple to apply with a wet sponge and easily removed with soap and water or rubbing alcohol. Available in a wide range of individual sheets or multi-sheet kits designed specifically for particular training modules.

Individual scenario placement and application instructions are included with each temporary tattoo set

CHAMP

Canine IV/Venipuncture Trainer

CHAMP, which stands for *Canine Hindlimb Advanced Model for Phlebotomy*, represents Remedy's initial foray into the Veterinary Medical Simulation field. Working in conjunction with many experts in the industry, we developed a simulation model that accurately represents a canine hindlimb in both appearance and functional anatomy. Our modular system allows trainees to practice venipuncture procedures on the lateral saphenous vein in the lower leg as well as intramuscular and subcutaneous injections in the upper thigh. CHAMP is constructed with urethane rubber and foam giving it a realistic look and feel with an authentic weight and skin texture. Remedy Simulation Group fabricates every CHAMP in the USA at our Perkasio, PA facility utilizing proprietary manufacturing techniques and locally sourced materials. Each complete CHAMP model includes a lower leg Venipuncture/IV trainer, upper thigh Injection trainer, IV tubing, IV bag and simulated blood pack.

"We had the privilege of test piloting this product at U of A College of Veterinary Medicine and it is the BEST that is on the market. The absolute BEST"

- Dr Ryanne Englar, University of Arizona

Since our inception, **Remedy Simulation Group** has worked in conjunction with multiple individuals and companies to help fulfill their vision for medical simulation training devices. Our team of experts work directly with our partners to ensure a seamless progression throughout the entire process. Through these Collaborative Partnerships, we have been able to not only assist others with the Design, Development and Fabrication of their ideas, but also expand our own ever-growing portfolio of medical simulation products and make them available to all of our customers. Contact us today to inquire about how we can assist you with your medical simulation needs.

PREMIE BABY

Premie Baby Measurement Trainer

Developed in partnership with a major corporation to demonstrate the proper method for measuring premie babies.

- Soft and delicate, realistic feeling silicone skin
- Incorporated skeletal core provides authentic joint movement
- Anatomical features provide accurate measurement reference points
- Authentic premie baby weight
- Available in light or dark skin tone

FRS ROBOTIC SURGERY DOME

FRS Robotic Surgery Trainer

Developed & produced in partnership with a non-profit institution to provide devices for neurological robotic surgery training.

- Training exercise diagrams are cast into the silicone outer skin
- Multiple tissue layers offer an authentic feel and surgical experience
- Incorporated vessels provide a more realistic training scenario
- 3D printed inserts with wire connectors challenge trainees' dexterity
